### INSIDE THIS ISSUE:

▪ Director's Corner	1, 2
▪ District Calendar	
▪ District VI 2022-4 Officers	2
▪ CAR-SGC Conference	
• Club Happenings	3-11
▪ District VI Annual Meeting	12
▪ Native Alternatives to Hostas	13-16
• Bird and Butterfly Report	17
• CAR-SGC Conference Schedule	18

### Director's Corner

**Deb Stumpf, District VI Director**

As your new District Director, I would like to take this opportunity to introduce myself to those of you who might not know me. I'm a retired registered nurse, married to my wonderful husband Rick (a retired Agriculture Education Instructor) and the mother of two daughters and grandmother to two wonderful grandchildren.

I grew up on a farm in Westmoreland County. When all the other girls my age were learning ballet, baton twirling or how to play the piano, I was outside helping my grandmothers tend their gardens. At their hands I learned plant identification, horticulture, and types of soil. This instilled in me a lifelong love of gardening. Every spring I still get the urge to get outside and "dig in the dirt". The flowers we grew were used in bouquets in the house and for reunions and family picnics, so I guess you can say I started "designing" early.

When I was looking to get involved in something after I retired, joining a garden club seemed like a logical choice. I have never regretted the decision. I have met so many wonderful people and the best part is that we all have the same thing in common. Gardening is always an instant conversation starter!

The theme of my Directorship is "Always Growing Together" I hope to be able to visit all your clubs and take an interest in what you are doing as a group. How you are not only growing your flowers and vegetables, but how you are growing your membership and your community involvement. I hope to be able to spread the word about outings and trips you are taking. And especially about any new horticulture, design, civic beautification or fundraising events you are planning. Make sure you include these things in your reports or notify me personally with any information you want passed along to the clubs of District VI.

Together the clubs of District VI can continue to thrive!

**Deb Stumpf**  
District VI Director (2022-2024)

### 2022-3 District Calendar

**Nov 2-3**—CAR-SGC Convention  
Seven Springs, PA  
**March 22**—District VI Meeting at  
Perkins in Richland—10:00 a.m.  
**April 21-23** GCFP Annual  
Convention, Double Tree by  
Hilton Monroeville

Articles, events and happenings concerning District VI may be submitted to:  
**Mary Lou Colussy at**

**DINNER SPEAKER**

Roses and Tulips and Sunflowers – Oh My!?!  
Tom Huston

VENDORS – Many!!

Hotel reservations may be made for Nov. 1-4 at special conference rate by phoning Seven Springs Resort at 814-352-7777

Registration form on CAR-SGC and GCFP websites

Indiana GC member and our new District Director, Deb Stumpf has shared some of her favorite blooms from her garden.

# CLUB ACTIVITIES

## BCGC Flower Show

### Bedford Garden Club

The Bedford County Garden Club held a Horticulture Specialty Flower Show on Wednesday, August 3, 2022 from 11am - 3 pm at the Presbyterian Church Hall, 115 E Penn St. It was free and open to the public.

### CLUB ACTIVITIES

The Baker Mansion Committee toured the gardens and then went to breakfast together for all their wonderful work and commitment this year. They commit their time every Tuesday morning from the beginning of Spring to early Fall and if you have never gone to the garden at Baker Mansion just stop by..... the gardens are gorgeous!

**Baker Mansion Committee**

### Blair Garden Club

### Member Receives Recognition

Joan Sweeda, a member of the Blair Garden Club, received an award from the Blair County Historical Society for the restoration of her home on 15th Ave in Altoona. The home (1884) was originally owned by John Collins.

The grounds have been restored to an elegant and eclectic Victorian space with an extensive garden complete with brick walls and iron gates, stone balustrade and sculptures.

**CLUB ACTIVITIES**

**JOIN US ON**  
**THURSDAY, DECEMBER 1, 2022**  
**10:00 A.M. TO 3:00 P.M.**  
**RAMADA BY WYNDHAM**  
**1395 WAYNE AVE, INDIANA, PA 15701**  
**FOR THE**  
**ANNUAL TINSEL TIME LUNCHEON**  
**HOSTED BY EVERGREEN GARDEN CLUB**  
*PEACE ON EARTH*

**ONLY 200 ADVANCED TICKETS SALES**  
 Boutique Shopping with Vendors and Evergreen GC Tables of Baked Goods, Fresh Greens, Santa Surprise, Raffle - Lunch, Entertainment, Holiday Design Program and Door prizes \$30.00 per Person  
**TICKETS MAY BE PURCHASED FROM THE BOOK NOOK AND HISTORICAL SOCIETY IN DOWNTOWN INDIANA, THE INDIANA COUNTY TOURIST BUREAU, INDIANA MALL, FLO'S FLORAL, HOMER CITY, OR BY CALLING 724-357-9479**  
**PROCEEDS BENEFIT SCHOLARSHIP AND COMMUNITY PROJECTS**

Plans continue for Evergreen's annual fundraiser, Tinsel Time on Thursday, December 1<sup>st</sup>, 2022.

A few changes were made including finding a new venue at the Ramada by Wyndham Indiana.

New this year will be buffet style instead of our usual sit-down luncheon. **Only 200 advanced tickets** will be sold for \$30. You can buy tickets at the Historical Society and the Book Nook in downtown Indiana, at the Indiana County Tourist Bureau in the Indiana Mall, at Flo's Floral in Homer City, from club members or by calling 724-357-9479. Marcy C also has some, if you need some for your club – 724-459-7229.

**Evergreen Garden Club**

Tinsel Time will offer the same activities as in the past with Boutique Shopping with vendors, and club tables with Santa Surprise, Raffle, Kitchen Goods and Fresh Greens. There will be Christmas music, a floral program and door prizes from local businesses. This year's theme is "Peace on Earth" for the fun-filled day of shopping with friends and family will be from 10:00am until 3:00pm. Buy your tickets early to help the Evergreen Garden Club raise monies for their community projects and scholarship(s). Save the date – December 1<sup>st</sup>.

Upcoming activities include making arrangements for the United Way Tables for their Annual Pancake and Sausage Day Fundraiser on Election Day. This will be at the New Life Church in the Indiana Mall. Members will be decorating the Silas Clark House for Christmas on November 9<sup>th</sup>. Greens workshop on November 28<sup>th</sup> to make the arrangements for Tinsel Time.

Evergreen Garden Club Treasurer and Scholarship chair, Carol Miller with Jenna Conrad, accepting the Mary Grove Scholarship of \$1,000, in memory of long-time club member Mary Grove.

Elizabeth Bruner was at a conference and was unable to attend. She was awarded the Jane Dole Scholarship of \$1,000, in honor of founding Evergreen Garden Club's founding member.

## IGC Gardens of the Month

August's Garden of the Month. Congratulations Michele Lewis

September's Garden of the Month. Congratulations Jennifer VanWeiren

### Indiana Garden Club

Indiana Garden Club's annual May Mart and Vendor Expo will be held May 19th and 20th, 2023 at the S&T Arena, White Township Sports Complex.

The club will feature its Orphan's Court plant sale and Garden Mart booth as well as the scholarship table. We hope to surpass our vendor total from last year. There will be lots of flowers and merchandise to buy!

As the winter months approach and we are stuck inside, mark your calendars and think about our delicious mushroom sandwiches and fresh strawberry pie.

For more information see our website: [www.indianagardenclub.org](http://www.indianagardenclub.org)

You can also find us on Facebook and Instagram.

## Save The Date

May Mart 2023  
 Friday, May 19th &  
 Saturday, May 20th  
 at  
 S&T Bank Arena

# CLUB ACTIVITIES

Thanks to Mona Weakland and her committee; the Annual Mum Sale was a huge success again this year.

## Patton Garden Club

Jan Davis presenting Mary Lou Colussy with Mushroom Award for Outstanding Contributions to the District Director during her term of office. Mary Lou also received a second-place award from GCFP for her D VI publication, *Seedlings*.

## PGC Gardens of Distinction

Deb and Chick Lamont of Bakerton

Audrey Lobick gardens

Louise and Dan Kline of Carrolltown

Gardens of Gene and Linda Huber

## CLUB ACTIVITIES

### Joint meeting/picnic at The Hayloft

What an outstanding joint meeting/picnic we had on Monday, July 11th with our friends from the Garden Club of Johnstown at The Hayloft in Rockwood. This was due mainly to the outstanding location provided by our special Friend of Somerset, Betty Lou Svonavec and her conscientious staff, most notably Jill Gary who made the beautiful floral arrangements at the entrance to the labyrinth.

Everyone enjoyed Betty Lou's presentation about their very special labyrinth, and the wonderful sunshine and cool breeze added the perfect finishing touch to an already ideal day.

**Somerset  
Garden Club**

## CLUB ACTIVITIES

W&S July program and meeting was held at Brandywine Conservancy's Penguin Court in Laughlintown on July 19. Penguin Court's over 1,000 acres is "splendor to the eyes". They gathered for a presentation by Melissa Reckner, Program Manager of Penguin Court, about the history of the property, information about the ongoing Pollinator Palooza program, and a tour of the greenhouse where thousands of plants (trees, shrubs and perennials) are grown each year. The pollinator garden, that is extended each year, lines the drive near the conservatory and was in full bloom. Melissa described and identified each of the plants.

Besides the tour, the program for the evening involved two speakers, Wendy Love, a PA Master Naturalist, and certified phenology expert, explaining how to use the Nature's Notebook app to record phenology observations; and W&S club member and Penn State Master Gardener, Patti Flowers-Jacobina on how to qualify and apply to have your garden become a Penn State Certified Pollinator Garden.

Patti FJ presenting the PS Certified Pollinator Garden "How To's".

### Weeders and Seeders

On August 16, back at the Loyalhanna Watershed Nimick Family Education Center preceding the meeting, club members were offered a Garden Hotline manned by the Penn State Master Gardeners of the club. Garden questions were emailed prior to the meeting and answers were researched and prepared to discuss at the meeting. One of the questions was how to trap the Spotted Lanternfly. Member and Penn State Master Gardener, Kate Nuernberger demonstrated how to build a Circle Trap. The Garden Hotline concept was well received and many of us learned new skills and tips.

We experienced a profound loss in our club with the passing of our dear friend, Mary Furlong-Leppold on September 3. Mary was active in the Weeders and Seeders, recently as Vice President and Hospitality Chairperson, and in the community as the leader of the Ligonier YMCA Penn State Demo Garden. We miss her. We will be memorializing her with a Little Free Library at the YMCA that will be built by an Eagle Scout with contributions.

On Friday, Sep. 9, Deb Christopher, Patti Schildkamp, Angela McDonnell, Judy Ridgway and Paula Heming attended the GCFP District VI annual meeting hosted by the Somerset Garden Club at The Heritage in Rockwood, PA. What a lovely time! The venue was amazing inside and out and the program, fundraising and FOOD was worth the trip. Our Weeders and Seeders Garden Club will be hosting the 2023 annual GCFP meeting on September 1<sup>st</sup> so we presented a humorous skit about Ligonier to entice everyone to attend.

(Continues on following page)

(Continues from previous page)

Mary Niezelski,, Recording Secretary, and a Penn State Master Gardener, presented our September 20<sup>th</sup> program, "My First Year Growing Dahlias" with a beautiful Powerpoint presentation of her dahlias, ways to grow and overwinter them, ways to keep pests away and showed us catalogs offering zillions of varieties to obtain. Mary also decorated each table with an arrangement of her dahlias... and then gave them away!

The oldest W&S club member at 93 yrs old, Ann Woodall, was surprised with a Happy Birthday song by our club members!

At the meeting, we distributed what we received at the GCFP District VI annual meeting: daffodil bulbs to the new members of the club and the awards won in 2021 to their recipients. They feel proud that to have had the most members join in a District VI club since September 2021 (20!) and were awarded a Laurel award (Andrea Kautz), 1st place 2021 Flower Show Schedule/Small Standard Flower Show for 21-49 members (Angela McDonnell and Paula Heming) and 3rd place 2021 Club Yearbook for 45-69 members (Paula Heming). In addition, six of our members were awarded a certificate and a cute bee pin for having their gardens certified as a Penn State Pollinator-Friendly Garden. These were also issued to us by Jan Davis, at the District VI annual meeting.

**Weeders  
and  
Seeders**

**Holiday Market**  
 Sat. Nov. 5  
 12 Noon ~ 4 PM

## Native Alternatives to Hostas (That Are Deer Resistant)

Source: Finegardening.com By Christine Alexander

These native plants are great options for gardeners who want the effect of hostas without attracting deer

Why would you ever want alternatives to hostas (*Hosta* spp. and cvs., Zones 3–9)? These garden favorites are seemingly perfect—they can adapt to sun or shade, come in a multitude of colors and forms, and do the hard work of shading out weeds while also somehow looking fabulous while doing it. They are one of a gardener's best tools when designing a garden.

But over the years, we have come to understand that for some gardeners, hostas are a nonstarter. These complaints typically come from those for whom deer pose an ever-present threat to their gardens. These gardeners should have some alternatives that, though not *quite* hostas, at least approach the form, habit, and color options hostas present—but that are avoided by deer.

Another group of people who sometimes question the popularity of hostas are those who are looking to incorporate more native plants into their beds for ecological diversity and to perhaps support wildlife that isn't currently being supported by the lovable, affable hosta.

While there is no real replacement for a hosta's big broad leaves and versatility, the options below do a good job as understudies.

### Umbrella plant

Umbrella plant (*Darmera peltata*), is a great hosta replacement for mild climates.

*Darmera peltata*. Photo: Jennifer Benner

Umbrella plant turns a lovely shade of reddish orange in fall. In mild climates, umbrella plant is a great choice for mimicking a large hosta's effect in the garden. It prefers wet, cool, shady areas. The leaves, which can grow up to 1½ feet across, provide gorgeous texture and turn red in fall.

**Name:** *Darmera peltata*

**Zones:** 5–7

**Native range:** Northwestern California to southwestern Oregon

**Size:** 3 to 5 feet tall and wide

(Continues on following page)

Photo: USFWS-Pacific Region-darmera\_peltata

## Giant trillium

*Trillium chloropetalum* var. *giganteum*.  
Photo: Leonora Enking

Trilliums are a welcome sight come spring in the northern woodlands of the Americas. This species, *Trillium chloropetalum*, is native to the western range of the Rocky Mountains, but it can make a home in most temperate places with a little help. Somewhat larger than other varieties you may be more familiar with, it can grow to an overall height of over 2 feet and features leaves that can reach 7 or 8 inches long. Because trilliums are found in native woodland and scrub, it does well in shady, naturalized areas. The one detail that may derail your dreams for a trillium on every corner of your garden is the plant's dormancy period, which begins in summer. Because of this, you may want to consider combining a trillium with another foliage plant that can take over as it recedes.

**Name:** *Trillium chloropetalum*

**Zones:** 6–9

**Native range:** West of the Rocky Mountains

**Size:** 18 inches to 2 feet tall, with leaves up to 8 inches long

## Skunk cabbage

Western skunk cabbage (*Lysichiton americanus*, Zones 7–9)

Eastern skunk cabbage (*Symplocarpus foetidus*, Zones 4–7). Photo: Justin Meissen

Disregard the name if you can. A large patch of skunk cabbage is a site to behold, and skunk cabbages make a gorgeous replacement for hostas, especially in damp areas. *Lysichiton americanus* can be difficult to establish, but it is native to the Pacific Northwest and has gorgeous large leaves. The yellow flower of this skunk cabbage is also quite interesting, although the interesting part is actually a spathe. *Symplocarpus foetidus* is native to the eastern coast of North America, and its foliage is somewhat rounder than that of its western cousin. Both do well in shade conditions but can also handle full sun, and they prefer wet soil to standing water.

**Name:** *Lysichiton americanus* and *Symplocarpus foetidus*

**Zones:** 5–9

**Native range:** Pacific Northwest (western skunk cabbage); East Coast (eastern skunk cabbage)

**Size:** Up to 3 feet tall and wide

(Continues on following page)

## Mayapple

Photo: Lynn Felici-Gallant

A mayapple colony is an excellent replacement for a hosta patch. This hardy perennial spreads via rhizomes and forms dense mats of umbrella-like foliage in damp, shady areas. Pollinators enjoy the flowers, and wildlife will eat the fruit. As an added benefit, mayapple can also be grown under black walnut trees (*Juglans nigra*, Zones 4–9) due to its juglone tolerance.

**Name:** *Podophyllum peltatum*

**Zones:** 3–8

**Native range:** North America west to the Southern Plains and Northern Plains

**Size:** 1 to 1½ feet tall and 1 to 2 feet wide (but colonies will spread and form large patches if allowed)

## Wild ginger

The small leaves of wild ginger are more akin to those of a hosta variety such as 'Sun Mouse' rather than 'Sum and Substance', but this plant works wonders as a ground cover in partial to full shade and beneath trees.

**Name:** *Asarum canadense*

**Zones:** 4–6

**Native range:** Manitoba to North Carolina

**Size:** 6 to 12 inches tall and 1 to 1½ feet wide (but colonies will spread and form large patches if allowed)

(Continues on following page)

## Goat's beard

Goat's beard prefers rich soil and is happy in full sun or partial shade. Though its foliage is less hosta-like than that of many in this list, the leaf habit, size, and showy flower spikes make it an interesting replacement for a spot typically reserved for hostas. Consider a cultivar such as 'Kneffi' if you're looking for a smaller variety. Goat's beard attracts bees, butterflies, and moths and acts as a host plant for the dusky azure butterfly.

**Name:** *Aruncus dioicus*

**Zones:** 4–8

**Native range:** Mid-Atlantic and midwestern United States

**Size:** 3 to 6 feet tall and 2 to 4 feet wide

## Shooting star

*Photo: Hannes Wilms*

Shooting star (*Dodecatheon meadia*).

Though shooting star is short lived in the garden, going dormant by midsummer, its foliage and flowers, which bumblebees in particular enjoy, make it a wonderful spring addition for texture and color in the garden. Shooting star will tolerate full sun as well as full shade as long as the soil drains well and is and evenly moist.

**Name:** *Dodecatheon meadia*

**Zones:** 4–8

**Native range:** Eastern North America

**Size:** 8 to 18 inches tall and 8 to 12 inches wide (but flower stalk can reach up to 3 feet in height)

*Christine Alexander is the editor of FineGardening.c*

### Bird and Butterfly Report

Marcy Cuncelman

Fall sure did come in and take over summer! It brought in the winter visitors like the Juncos, Kinglets, and Sparrows before October 1<sup>st</sup>. Trees are changing and losing their leaves, making it easier to see the few summer residents still hanging around like the Phoebes, Vireos and Towhees. They should be moving to warmer temps since frost is in the air. Hummers are gone, but still have my feeders up and flowers to attract those late migrants. There have been sightings of Rufous Hummers around the state, using the feeders and flowers. So, if you see a late hummer and there is rusty color, esp. on the tail, please let me know, so I can report it and see if it can be banded. Take a photo to help ID, since there could be other Western Migrants.

Bumblebee on cigar plant cuphea, also for hummers

While out mowing, enjoying the last of the beautiful blooms of the native perennials, I was observing many birds on and under the plants eating seeds and bugs. If you can, please don't cut back all your plants, so there is winter cover and natural food for the birds and critters. If you do cut back, please make a loose brush pile with the stems, since many pollinators use these for winter hibernation until it warms up until May. Speaking of a brush pile, why not make one out of the downed branches and twigs for added protection for the birds this winter. We put one where we can see from the house and put mixed seed under it, for the scratching birds like the Juncos and Sparrows.

Fresh male monarch 10/16/22

If you have been following Monarch Watch thru the years, Chip Taylor was the strong inspiration for keeping this going. He has announced that he will be stepping down in August 2023 if his health stays strong. I couldn't believe he is 85 and has worked for free. He says he still has projects to finish and journals to write. They will be finding a paid person to take his place and applications are now out to look for his replacement. We all wish you well Chip!

Female monarch on zinnia 10/13/22

Did you see more Monarchs this year? Better than last year, but all the butterfly and bee numbers are way down compared to other years.

The weather this year was so up and down, dry and drought in places and other places wet and rainy. Here's to a better 2023. It's a great time to plant for the birds and butterflies and critters. Look for native plants that would offer nectar bloom for pollinators, fruit and color for the birds and host caterpillars, and cover all year for nesting and a safe place to perch.

Time to get those feeders clean and filled. Make sure you keep the feeders clean thru out the season. Its time to enjoy the plants you have been adding to your yard to improve your habitat. Keep a journal and you will be surprised how many birds you see and how adding some more natives and fruit bearing trees and shrubs will bring them closer for you to enjoy! Hope you see something new and interesting!!! Marcy Cunkelman, Bird and Butterfly Chair, plant4nature@gmail.com
